

Age of Invention iMovie Project

Today in class and for the next couple of days you will be working on an iMovie project. This project will be over a specific topic about the age of invention, which is listed below. For this project you will work with one partner and will describe your event in depth as well as explain the reaction and effect your topic had on society. You will not use any hand held footage for your presentation. You will be using pictures and any video clips that you may be able to find while also adding music to your presentation. You will be narrating the video so reference your notes, book, and any research you may need to do for your topic. Make sure your voice is consistently loud enough to hear over your music. Remember to site everything you use for your project. The rubric for this activity is on my website. Your presentations will need to be 3 – 5 minutes long.

Requirements:

- Who invented?
- Why was it invented?
- Uses for your topic then and now
- Impact on society then and now
- Evolution of your topic over time
- If your topic is not around anymore, give me a modern day example of your product

Topics/terms:

- Steel
- Oil
- Railroads
- Airplanes
- Telegraph
- Telephone
- Typewriter
- Thomas Edison and Menlo Park
